RISK ASSESSMENT NOTES FOR GUIDANCE

Using the guidelines shown below please consider what a risk there is to those building up trade and autojumble stands and to members of the public during the show. Outline the steps you propose to take to minimise that risk in the table below. If in your opinion there is no risk please print **NO RISK** and return the form.

| HAZARD | WHO MIGHT BE HARMED | IS MORE CONTROL NEEDED TO CONTROL THE RISK |
|--|---|--|
| Look for hazards which you could reasonably expect to result in significant harm under the conditions at your plot. Use the following examples as a guide. | There is no need to list individuals by name - just think about groups of people doing similar work or who may be affected e.g | For hazards the hazards listed, do the precautions already taken |
| Slipping/tripping hazards Chemicals (e.g battery acid) Moving parts of machinery (e.g blades) Work at height (e.g from mezzanine floors) Pressure systems Vehicles (e.g fork-lift trucks) Electricity Dust (e.g from grinding) Manual handling Noise Lifting operation | Maintenance personnel Contractors People sharing your work place Operators Cleaners Members of the public Pay particular attention to: Staff with disabilities Visitors Inexperienced staff Lone workers - They may be more vulnerable | Meet the standards set by legal requirements? Comply with a recognised industry standards? Represent good practice? Reduce risk as far as reasonably practicable? To ensure safety have you: Adequate information, instruction or training? Adequate systems or procedures? If so, then the risks are adequately controlled, but you need to indicate the precautions you have in place. Where the risk is not adequately controlled indicate what more you need to do (the 'action list') |
| Fire Hazard e.g combustible materials (rubbish, flammable substances, LPG etc) and ignition sources (flames, smoking etc) | As above | Means of escape: fire detection and alarms. Fire fighting equipment and fire evacuation plan. |
